

SiteStrong Theme for WebGUI
(Installation instructions, August 2009)

The SiteStrong Theme for WebGUI has been created according to the guidelines as published in the [How To Give WebGUI Your Own Style wiki entry](#).

Consequently the following installation procedure has to be executed in order to ensure all functionality is available:

A) To import and select the SiteStrong Theme for pages:

- 1) Create the folder Root/themes
- 2) Navigate to folder Root/themes
- 3) Import downloaded package "themes_sitestrong.wgpkg" from your computer
- 4) Navigate to folder Root
- 5) Select "Edit Branch" from the More menu for the Home Page Layout
- 6) On the Display tab: Change Style Template to "Sitestrong Style" and "Change recursively" to "yes", then hit "save" button

B) To select SiteStrong theme for Admin functions:

1. Select from Admin Console "Settings" item
2. On the UI tab: Change User Function Style to "SiteStrong Style"
3. On the Account tab:
 1. In Profile Section change Style Template field into "SiteStrong Style"
 2. In Inbox Section change Style Template field into "SiteStrong Style"
 3. In Friends Section change Style Template field into "SiteStrong Style"
 4. In Contributions Section change Style Template field into "SiteStrong Style"
 5. In Shop Section change Style Template field into "SiteStrong Style"
 6. In Account Section change Style Template field into "SiteStrong Style"

C) Optionally, if during the WebGUI site starter wizard the "All Contact Us" has been created, some more SiteStrong Theme functionality can be selected:

1. Select from Admin Console "Assets" item
2. Navigate to Root/Home
3. Select "+All Contact us"
4. Select Edit menu for the "All Contact Us" Dataform
5. On the Display tab: Change Data Form Template to "SiteStrong Dataform" and List Template to "SiteStrong Data List"

D) Optionally, if during the WebGUI site starter wizard the "Initial Pages" have been created, some more SiteStrong Theme functionality can be selected:

1. Select from Admin Console "Assets" item
2. Navigate to Root/Home
3. Select "+Initial Pages" Page Layout
4. Select "+Initial Pages" Message Board
5. Select Edit menu for the "Support" Collaboration System (or another CS)
6. On the Display tab: Change Collaboration System, Thread Template to "SiteStrong Thread"

End of document.
